TECHNICAL DATASHEET

ref. 53662

LEAK TESTER FOR CYLINDER HEAD GASKET

Function

This tool is designed to check for leaks between the combustion and the cooling system of water-cooled engines. The combustion process produces (among other gases) 13-14% CO2 in the exhaust, and leaks of this gas into the cooling system are easily detectable. If combustion gases are present, the color of the check fluid will change to yellow or green and this is evidence of CO2 leakage in the coolant.

***The test fluid can NOT be reused.**

Advantages

- ✓ Fast, convenient and economical
- ✓ Case for storage and transport
- ✓ Light weight
- ✓ Easy to use

Contains

Round bottle	**Round bottle 200ml**
Square bottle	**Square bottle 250ml**
Adapters	**Small: Toyota, Mitsubishi**
	Medium: Suzuki, Toyota, Mitsubishi, Mitsubishi, Subaru, Peugeot, Nissan, Lexus, Mazda
	Large: Ford, GM, Benz , JEEP
